

# TR500-70

A 3-layer construction with high efficiency and lower pressure drop, this fully synthetic media will optimize power output, reduce maintenance cost and increase compressor & turbine lifetime. A 3rd outer layer acts as a Pre-Filter to remove larger particulate, keeping unburnt hydrocarbons, salt, moisture and all particulate from getting to the HEPA membrane or 2nd stage filter.

## FEATURES

- 3 Weights Available: 70 GSM, 130 GSM & 200 GSM
- Extremely High Dust Holding Capacity
- Strengthened 3-Layer Lamination
- Greatly extended filter life
- Increases Gas Turbine Availability
- Special 3rd layer reduces corrosion
- High Efficiency E12 Filtration
- Can be pulsed or used in static filtration for V-Bank Construction
- 3rd layer protects from salt and unburnt hydrocarbons from effecting performance

## APPLICATIONS

- Gas turbine HEPA grade
- Power plants
- Pharmaceutical
- Biomedical air filtration
- Hazardous material collection
- Electronics
- Compressors
